SKU: TSA-300-CUTQUIK

Categories: [STIHL](#)

Product Description

Features

STIHL Magnetic Filter -The TSA 300 STIHL Cutquik® brushless motor is protected from the influence of fine metal dust particles because of a magnetic filter, increasing the lifetime of the unit.

Increased Cutting Depth On a 12" Wheel Cut-Off Machine (TSA 300) -The TSA 300 STIHL Cutquik® is designed to cut deeper than a 12" TS 410 gas-powered cut-off machine.

Lightweight Design -The lightweight design helps reduce operator fatigue.

Compact Powerhead Design (TSA 300) -The TSA 300 STIHL Cutquik® compact powerhead design means less user fatigue and greater productivity.

Electronic Coast Down Brake -The electronic coast down brake stops the cutting wheel in less than four seconds.

Water Resistance While Wet-Cutting -The TSA 300 STIHL Cutquik® is water resistant while wet-cutting.

Variable-Speed Trigger -The variable-speed trigger allows precise control for each task.

Brushless Motor -The advanced brushless motor virtually eliminates maintenance while supplying the power and performance you expect from STIHL.

Water Connection and Shut-Off Valve -The water connection is designed for the user to shut off the water when the unit is not in use and not waste water.

Quick Connect Hose Adapter -The quick connect hose adapter is designed not to spray water on the user when the pressurized water hose is disconnected.

Magnesium Guard -The cutting wheel guard is made from lightweight and durable magnesium to improve maneuverability.

STIHL Smart connector 2 A Ready -With its motor housing molded to accept the Smart connector 2 A, users are able to take advantage of the STIHL connected platform. STIHL connected gives users a new level of tool management from their connected device.

IPX4 Rating -This tool is IPX4-rated for weather-resistant construction and has been designed and tested for splash-water protection.

Multi-Function Control Handle -Having easy access to all controls on one handle helps make it easier to complete tasks, so the operator's hand never has to leave the handle.

Semi-Automatic Belt Tensioning -With consistent semi-automatic re-tensioning, this feature increases the

service life of the belts and shaft bearings

Ergonomic Grip -The ergonomic top-handle bar design provides an optimal comfortable grip in any working position.

Warnings and Safety

WARNING! Never use carbide-tipped, wood cutting, or circular saw blades on cut-off machines. They can cause severe personal injury or death from reactive forces, blade contact, or thrown tips. Never cut wood of any type.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.
