SKU: HT-105

Categories: [STIHL](#)

Product Description

Features

Telescoping Pole -With an adjustable shaft, telescoping pole pruners can cut branches up to 16 feet above ground.

Purge Pump Primer -At the press of a button, this small fuel pump delivers fuel to the carburetor, reducing the number of starting pulls needed after an extended break between uses.

Multi-Function Control Handle -Having easy access to all of the controls on one comfortable handle helps makes it easier to complete tasks so the operator's hand never has to leave the handle.

Anti-Vibration System -STIHL has a system for minimizing the vibration levels of handheld outdoor power equipment. The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

Made in America -A majority of STIHL products sold in America are made in America of U.S. and global materials.

Balanced design -Balanced design makes it comfortable to use.

IntelliCarb™ Compensating Carburetor -The IntelliCarb™ Compensating Carburetor is designed to automatically adjust the air/fuel ratio when the air filter becomes restricted or partially clogged and maintains the engine's correct RPM. IntelliCarb™ uses air from the clean side of the air filter to control the diaphragm and flow of fuel. As their air filter becomes dirty and less air is available for the carburetor, the IntelliCarb™ system adjusts the fuel flow to compensate for the decrease in air flow. This is in contrast to typical carburetors that utilize the air from the "dirty" side of the air box.

Tough metal gearbox with durable metal branch hook -The new lightweight gearbox design provides high-speed precision while pruning, allowing for easy handling when reaching for high branches

Vertical Pleated Paper Air Filter -Thanks to better air filtration due to its greater surface area, the vertical pleated paper air filter can extend the time between servicing.

Semi-Automatic Choke Lever -The semi-automatic choke lever enables the simplified three-step start procedure, saving users time and allowing them to start jobs faster.

One-touch Stop Button -Users can save time and reduce the chance of flooding thanks to the one-touch stop button, which allows the engine to be shut off with the simple press of a button.

New quick-adjustment clamp nut with no-slip grip design -The new quick-adjustment clamp nut with no-slip grip design enhances user comfort and allows for easy adjustment of the shaft.

1/4" STIHL PICCO™ saw chain -With its narrow design, the 1/4" STIHL PICCO™ saw chain requires less pressure and force to cut compared to the previous models producing fast, clean results.

The Made in America⁹ HT 105 pole pruner is designed to help pros tackle both high and low-hanging branches, while minimizing operator fatigue and maximizing cutting precision. Its new square telescoping shaft increase rigidity while extending to a variety of heights and easily locks into position, allowing you to prune high branches with ease thanks to its lightweight design. With its semi-automatic choke lever, one-touch stop, no-slip grip design, and 1/4" STIHL PICCO TM 71™ PM3 saw chain, the HT 105 makes tough jobs easier. Whether pruning, performing storm cleanup, or taking on tree maintenance, this pole pruner is ideal for landscaping and tree service professionals who value performance and efficiency.
